Applicant : James E. Owen
Title : SYSTEMS AND METHODS FOR DOWN
SCALING A BITMAP
Filed : March 15, 2004
TC/A.U. : (not yet assigned)
Examiner : (not yet assigned)
Docket No. : SLA1573
Customer No. : 21552

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

TRANSMITTAL OF INFORMATION DISCLOSURE STATEMENT

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicant and/or his attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(b), the enclosed Statement is being filed within three (3) months of the filing date of the above-identified application or before the mailing date of a first Action on the merits.

Neither applicant nor his attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the

information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Forms PTO/SB/08a and PTO/SB08b "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Forms PTO/SB/08a and PTO/SB/08b, except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

1. Japanese Patent No. 1-0164483 published June 19, 1998 discloses a system and method to easily retrieve desired image data for a plural number of pieces of stored image data and to provide data to easily retrieve the desired image data with an image data receiver. A still image with low resolution (an index image & alpha) is first photographed, after that a dynamic image or the still image (detailed picture & beta) by specified resolution is photographed and both pieces of image data are stored in the same file by an image data transmitter. When one file is specified among plural files stored in the image transmitter and the detailed image & beta is

received by a receiver, all of the index image & alpha are transmitted from respective files by the image transmitter. The contents of respective films are properly confirmed by listing the received index image & alpha by pieces by the image receiver. The detailed data & beta is received from the image transmitter by specifying the desired file to be transmitted by the image receiver.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Wesley L. Austin", is written over a horizontal line.

Wesley L. Austin
